

ESNC UNIVERSITY CHALLENGE

To bridge the gap from GNSS research and academia to entrepreneurship, the ESNC University Challenge addresses students and research associates with a background in geospatial, GNSS, and applications oriented areas such as aerospace, engineering, surveying, computing & business. In particular, the University Challenge is aiming to foster the transformation of bright ideas into commercial ventures.

APPLICATION FIELDS 2015

- 22% Mobile LBS
- 22% Smart Moving
- 16% Safety & Security
- 14% Industry Applications

BRIDGE THE GAP FROM GNSS RESEARCH & ACADEMIA TO ENTREPRENEURSHIP

GNSS Market

A growing market comprising products and services using GNSS-based positioning as a significant enabler offers opportunities in a complex technological landscape. Global enabled GNSS markets are forecasted to grow to approximately EUR 250 billion per annum by 2022. New smartphone capabilities alongside integrated technologies are blurring the market segment breakdowns. New applications are continually introduced and consumers have begun to appreciate the capabilities of LBS in their daily lives.

Events

- > Annual Awards Ceremony bringing together Europe's space community
- > Satellite Masters Conference (> 400 participants from 40 countries) connecting leading institutions and industry with start-ups & award-winning entrepreneurs
- > Involvement in > 60 events per year worldwide (e.g. regional kick-offs)
- > Dedicated student workshops at prestigious universities

Partnering benefits in 3 areas
