

Prof. Olfa Kanoun received in 2001 the Ph.D. degree from the institute for measurement and automation at the Universität der Bundeswehr München. She was awarded from the AHMT (Commission of Professors in Measurement Technology, Germany) for the best dissertation in 2001. In 2004 she founded the IEEE Instrumentation and Measurement Chapter in the IEEE section Germany. In 2006 she was a short term professor for metrology at the University of Kassel. Since 2007 she is professor for Measurement and Sensor Technology at Chemnitz University of Technology in Germany. She is member of the IMEKO Technical Committees TC-4 and TC- 19, Editor-in-Chief of the International Journal Transactions on Systems, Signals and Devices and guest Editor for several Journals. She has been serving on several technical program committees of numerous international conferences. Her main research fields are: Impedance Spectroscopy, Energy Harvesting and Micro and Nano Sensors.
